

AEGISNEXA

— SECURITY SERVICES —

Protection. Precision. Trust.

COMPANY PROFILE / 2026

Professional Guards. Disciplined Protection.

Professional security guarding solutions for dependable on-ground protection.

WHO WE ARE

Professional guarding. Built on discipline.

AEGISNEXA SECURITY SERVICES provides professional security guard manpower and on-site guarding solutions for businesses, institutions, residential communities and commercial premises.

Our approach is built around dependable manpower, clear post responsibilities, professional conduct, site discipline and responsive supervision - the fundamentals that make day-to-day security effective.

Protection that performs at ground level.

Every assignment is planned around the actual site requirement, with attention to guard suitability, duty clarity, shift continuity and professional interaction at the client premises.

Vigilance

Discipline

Trust

Professional security starts with the person on post.

Our guarding solutions cover gate security, access control, patrolling, premises vigilance and reliable shift execution according to the needs of each site.

OUR FOUNDATION

A clear purpose from day one.

Our purpose is to deliver dependable guarding through disciplined manpower, clear responsibilities and professional service standards.

01 / MISSION

Deliver dependable guarding.

To provide professional security guard manpower through disciplined deployment, clear post duties, responsible supervision and responsive client coordination.

02 / VISION

Become a trusted guarding partner.

To build long-term client confidence through consistent guard performance, professional conduct and dependable security operations across every assignment.

CORE VALUES

INTEGRITY

VIGILANCE

DISCIPLINE

RESPECT

ACCOUNTABILITY

Strong execution begins with strong fundamentals.

Our service standards emphasise manpower suitability, duty performance, attendance, supervision, professional conduct and clear client communication.

Professional guard manpower. Structured for the site.

AEGISNEXA provides guarding manpower and on-site security support tailored to the duty posts, shift requirements and operating environment of each client location.

01 / GUARDING

Security Guards

General security guard deployment for gates, premises, offices, commercial sites and other client locations.

02 / LADY GUARDS

Lady Security Guards

Female security personnel for locations and assignments where lady guard deployment is required.

03 / SUPERVISION

Security Supervisors

Supervisory manpower for larger deployments where shift discipline, post checks and team coordination are required.

04 / ACCESS

Gate & Access Security

Guard deployment for controlled entry, visitor verification, vehicle movement and front-gate discipline.

05 / PATROLLING

Premises & Patrol Security

Routine guarding and patrolling of buildings, compounds, common areas, perimeters and designated sensitive points.

06 / SHIFT COVERAGE

Shift-Based Deployment

Day, night or rotational guard deployment structured according to site requirement and manpower availability.

Deployment built around your requirement.

Guard strength, duty hours, post responsibilities and supervisory requirements are planned according to the site, operational need and agreed deployment structure.

Clear duties. Professional execution.

ON-POST DISCIPLINE

A guard should know exactly what the post requires.

Post instructions

Responsibilities defined according to the client location and assigned security post.

Shift discipline

Timely reporting, proper handover and continuity of duty across shifts.

Professional conduct

Alertness, uniform appearance, respectful communication and responsible behaviour.

Reporting

Basic registers, unusual-incident reporting and communication with designated client contacts.

Typical guard duties

Actual duties are finalised according to each site, but guard responsibilities may include:

- Controlling entry and exit at the assigned gate or access point.
- Checking visitors and maintaining visitor / entry records as instructed.
- Monitoring authorised movement of vehicles, materials or deliveries at the gate.
- Patrolling designated areas and observing unusual or suspicious activity.
- Reporting incidents, security concerns or rule violations to the authorised person.
- Following site emergency instructions and assisting in orderly response where required.
- Maintaining shift handover notes, post registers and basic duty documentation.

Guarding that adapts to the site.

Security guard duties differ by location. AEGISNEXA can plan guard deployment according to the client's site, shift and access requirements.

Corporate Offices

CO

Gate security, reception-area vigilance, visitor entry and workplace access control.

Industrial Sites

IN

Gate duty, perimeter vigilance, staff / vehicle movement control and patrol responsibilities.

Warehouses

WL

Guarding support for entry points, vehicle movement, deliveries and premises vigilance.

Residential Communities

RE

Resident / visitor entry, gate discipline, common-area observation and patrol support.

Schools & Institutions

ED

Controlled entry, gate monitoring and professional security presence around the premises.

Hospitals & Clinics

HC

Entry control, visitor guidance and security presence suited to sensitive environments.

Retail & Commercial

RH

Front-entry security, premises vigilance and basic movement-control duties.

Construction Sites

CN

Entry monitoring, perimeter guarding and movement checks at active project locations.

Other Premises

OT

Guard manpower can be planned for other suitable client sites after requirement review.

Deployment is requirement-based. Final guard strength, duty hours and post responsibilities depend on site conditions, client requirements and manpower availability.

Simple process. Clear responsibility.

A guarding assignment should begin with a clear understanding of the site and the exact role expected from each guard.

1

Requirement Discussion

Understand location, duty hours, number of posts, site timings, access points and client expectations.

2

Site Visit / Post Review

Review the proposed guard posts, movement areas and practical duty requirements where a site visit is needed.

3

Manpower & Shift Planning

Plan guard strength, shift timing, relief requirement and supervisory need based on the assignment.

4

Selection & Assignment Briefing

Assign suitable personnel and brief them on post duties, reporting lines, conduct and client-specific instructions.

5

Deployment

Place guards at the agreed posts and establish shift handover, attendance and communication procedures.

6

Supervision & Review

Review attendance, conduct and post performance and address operational issues raised by the client or field team.

Professional standards clients can rely on daily.

Our service commitment is practical and measurable: dependable guard presence, disciplined duty performance, clear responsibilities and responsive communication.

01 / RELIABILITY

Dependable manpower

Guard deployment is planned around the agreed duty requirement, post structure and shift coverage of each site.

02 / DUTY CLARITY

Site-specific instructions

Guard responsibilities are intended to be defined according to the actual post and client requirement.

03 / DISCIPLINE

Professional conduct

Emphasis on punctuality, uniform appearance, alertness, respectful communication and duty discipline.

04 / CONTINUITY

Shift management

Attention to attendance, handover and operational continuity so assigned posts remain properly managed.

05 / SUPERVISION

Field accountability

Supervisory support can be planned according to deployment size and assignment requirement.

06 / COMMUNICATION

Responsive coordination

Clear contact and escalation channels for client feedback, attendance issues and site concerns.

Assignment briefing & basic training focus

Depending on the assignment, guards can be briefed on post duties, gate control, visitor handling, patrolling, reporting, emergency instructions, professional conduct and client-specific procedures. Applicable statutory or licence requirements must be followed before deployment.
